# What is Rallycross ?

Combining the features of Solo II and ProRally, a RallyCross event lets drivers race against the clock on a dirt course. Total elapsed time for a driver's multiple runs (minus the worst run) is used to determine placing for the event. The exciting aspect of this new class of events is that stock street vehicles are allowed to compete.

Safety equipment required is stock or better seatbelts and a Snell 90 or newer helmet. Loaner helmets will be available, courtesy of FL Region Solo II program.

As in Solo II, competitors staff locations around the course for safety between their own runs. The course is relatively smooth and large rocks have been removed. There are elevation changes; most of the course will be run in second gear (average speed 37 mph)

Due to the nature of loose surfaces, the course condition will change throughout the event. This situation may necessitate a course change during the event if an unsafe or dusty condition arises.

Organizers have the right to change the course, AT ANY TIME during the event to maintain a level of safety. As in ProRally, there is no guarantee that all competitors will have the same course conditions. Series Championship Awards for best performance in
